

SIDEWINDER

Lumsden Belting announces a revolutionary new wire belt using side flattened, shaped wire technology, which provides superior strength, greater open area, and dramatically longer belt life.

So “**get in shape**” now with Sidewinder.

LUMSDEN BELTING

The Sidewinder belt can be run with a sprocket drive, a friction drive, or a chain driven belt in any standard wire material.

It has applications in food, heat treat, insulation, or anywhere that needs a longer lasting belt to solve wear life issues.

Get in Shape with Sidewinder Belt.
Slimmer yet stronger, and lasts much longer.

5 Reasons to get in Sidewinder Shape

- Side shaped wire is stronger
- Flat wire sides reduce carry over
- Quick and easy to splice
- More open area
- Belt lasts much longer

Best Applications

- Breaders
- Fryers and ovens
- Cooling lines
- Batter Applicators
- Furnaces
- Any difficult application

Breader Belt after running 6 months.
Note: minimal carry-over.
